

Owner: BurntWood ApS  
No.: MD-22057-EN  
Issued: 18-01-2023  
Valid to: 18-01-2028

3<sup>rd</sup> PARTY VERIFIED

**EPD**

VERIFIED ENVIRONMENTAL PRODUCT DECLARATION | ISO 14025 & EN 15804

**Owner of declaration**  
 BurntWood ApS  
 Mondrupsvej 8, Stavtrup  
 VAT no.: 41275634

**Issued:**  
 18-01-2023

**Valid to:**  
 18-01-2028

**Programme**  
 EPD Danmark  
[www.epddanmark.dk](http://www.epddanmark.dk)

- Industry EPD
- Product EPD

**Declared product(s)**  
 BurntWood surface treatment

Number of declared datasets/product variations: 1

**Production site**  
 Buggesgårdvej 66, 8260 Viby J, Danmark

**Product(s) use**  
 The BurntWood surface treatment is used on wood which is used as façade cladding.

**Declared/ functional unit**  
 1 m2 surface treated with the BurntWood method

**Year of production site data (A3)**  
 Period for data collection: 8/6-2022 – 14/11-22

**EPD version**  
 First edition 01.

**Basis of calculation**

This EPD is developed in accordance with the European standard EN 15804+A2.

**Comparability**

EPDs of construction products may not be comparable if they do not comply with the requirements in EN 15804. EPD data may not be comparable if the datasets used are not developed in accordance with EN 15804 and if the background systems are not based on the same database.

**Validity**

This EPD has been verified in accordance with ISO 14025 and is valid for 5 years from the date of issue.

**Use**

The intended use of an EPD is to communicate scientifically based environmental information for construction products, for the purpose of assessing the environmental performance of buildings.

**EPD type**

- Cradle-to-gate with modules C1-C4 and D
- Cradle-to-gate with options, modules C1-C4 and D
- Cradle-to-grave and module D
- Cradle-to-gate
- Cradle-to-gate with options

CEN standard EN 15804 serves as the core PCR
Independent verification of the declaration and data, according to EN ISO 14025

# Product information

## Product description

The main product components are shown in the table below.

Material	Weight-% of declared product
Linseed Oil Varnish	100%

## Important notice

This EPD only covers the surface treated with the BurntWood method. To obtain environmental impacts of a total m<sup>2</sup> surface wood, **this** EPD must be combined with the EPD of the wood product.

## Product packaging:

The composition of the sales- and transport packaging of the product is shown in the table below.

Material	Weight-% of packaging
Kraft paper	34%
Joints	64%
PET strap	2%

## Representativity

This declaration, including data collection and the modeled foreground system including results, represents the production from a single producer and a single production site. The production site is located at Viby J in Denmark. The end-of-life represents disposal in Denmark. Background data are based on Ecoinvent 3.8 database and are less than 10 years old. Generally, the used background datasets are of high quality, and the majority of the datasets are only a couple of years old.

## Hazardous substances

BurntWood surface treatment does not contain substances listed on the "Candidate List of Substances of Very High Concern for authorisation"

(<http://echa.europa.eu/candidate-list-table>)

## Essential characteristics

BurntWood are covered by harmonised technical specification EN 350:2016

Further technical information can be obtained by contacting the manufacturer or on the manufacturers website:

<https://www.burntwood.dk/data/>

## Reference Service Life (RSL)

No RSL is declared. This EPD is based on a cradle to gate with modules C1-4 and D, and does not include the use stage.

## Picture of product

# LCA background

## Declared unit

The LCI and LCIA results in this EPD relates to 1 m<sup>2</sup> surface treated with the BurntWood method

Name	Value	Unit
Declared unit	1	m <sup>2</sup>
Density	0,86	kg/m <sup>2</sup>
Conversion factor to 1 kg.	1,16	-

## Functional unit

Not defined

## PCR

This EPD is developed according to the core rules for the product category of construction products in EN 15804+A2.

## Guarantee of Origin – certificates

### Foreground system:

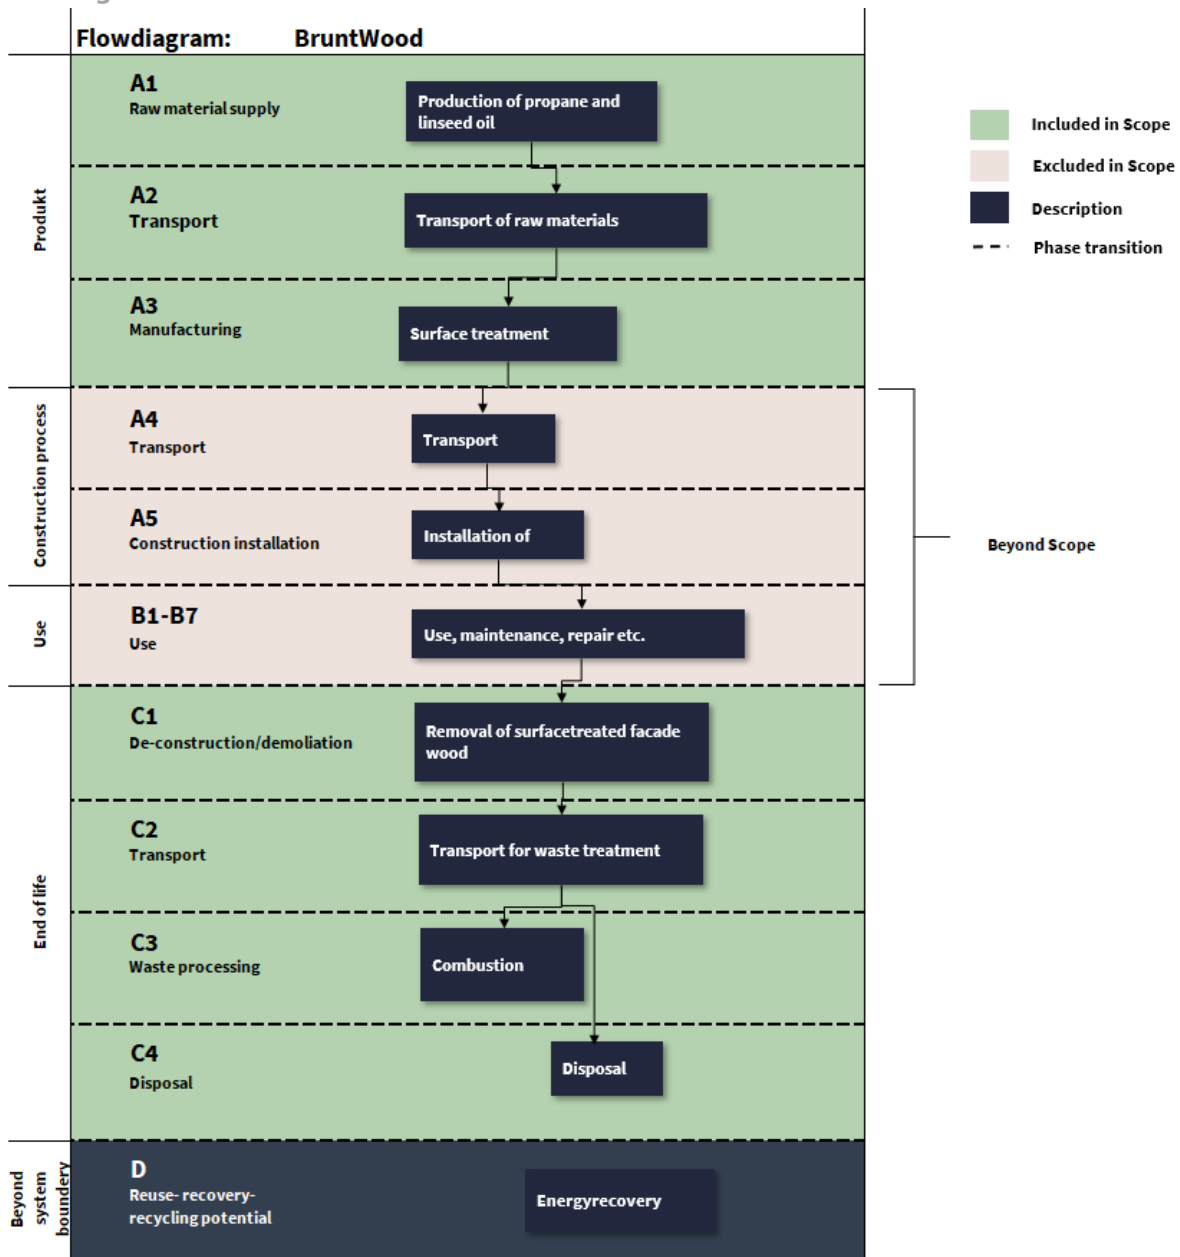

No use of certified green energy. Average energy mix from Denmark is used in production.

### Background system:

No use of certified green energy.

Upstream processes are modelled using national energy mix. Downstream processes are modelled using national energy mix.

### Flowdiagram

## System boundary

This EPD is based on a cradle-to-gate LCA, in which 100 weight-% has been accounted for.

The general rules for the exclusion of inputs and outputs follows the requirements in EN 15804, 6.3.5, where the total of neglected input flows per module shall be a maximum of 5 % of energy usage and mass and 1 % of energy usage and mass for unit processes.

### Product stage (A1-A3) includes:

A1 – Extraction and processing of raw materials

A2 – Transport to the production site

A3 – Manufacturing processes

The product stage comprises the acquisition of all raw materials, products and energy, transport to the production site, packaging and waste processing up to the “end-of-waste” state or final disposal. The LCA results are declared in aggregated form for the product stage, which means, that the sub-modules A1, A2 and A3 are declared as one module A1-A3.

### End of Life (C1-C4) includes:

End-of-life includes a Danish scenario for waste processing of oiled wood. According to the Danish Environment Agency, oiled wood is treated as combustible waste, which means that the material is incinerated as waste.

C1 – Deconstruction demolition

C2 – Transport to waste processing

C3 – Waste processing

C4 – Disposal

The surface treatment has no influence on the deconstruction or demolition of the surface treated wood.

As this EPD only covers the surface treatment of the wood, the wood isn't included in the end-of-life state. Only the remaining linseed oil in the surface treated wood is included in the waste processing.

### Re-use, recovery and recycling potential (D) includes:

As the materials gets incinerated, electricity and heat will be produced, which replaces electricity in the Danish grid mix, and heat produced by natural gas.

Disclaimers	<sup>1</sup> The results of this environmental indicator shall be used with care as the uncertainties on these results are high or as there is limited experienced with the indicator. <sup>2</sup> This impact category deals mainly with the eventual impact of low dose ionizing radiation on human health of the nuclear fuel cycle. It does not consider effects due to possible nuclear accidents, occupational exposure nor due to radioactive waste disposal in underground facilities. Potential ionizing radiation from the soil, from radon and from some construction materials is also not measured by this indicator.

BIOGENIC CARBON CONTENT PER m <sup>2</sup>		
Parameter	Unit	At the factory gate
Biogenic carbon content in product	[kg C]	0,65
Biogenic carbon content in accompanying packaging	[kg C]	0,052
Note	1 kg biogenic carbon is equivalent to 44/12 kg of CO <sub>2</sub>	

# Additional information

## LCA interpretation

The raw material which are of most importance is the linseed oil, as the linseeds during the growing is fertilized, watered and uses land. The harvesting of the seeds does also contribute to the environmental impacts.

## Technical information on scenarios

### End of life (C1-C4)

Scenario information	Value	Unit
Collected separately	0	kg
Collected with mixed waste	0	kg
For reuse	0	kg
For recycling	0	kg
For energy recovery	0,86	kg
For final disposal	0	kg
Assumptions for scenario development	0	As appropriate

### Re-use, recovery and recycling potential (D)

Scenario information/Materiel	Value	Unit
Electricity from incineration	1,5	MJ
Heat from incineration	3,0	MJ

## Indoor air

*The EPD does not give information on release of dangerous substances to indoor air because the horizontal standards on the relevant measurements are not available. Read more in EN15804+A1 chapter 7.4.1.*

## Soil and water

*The EPD does not give information on release of dangerous substances to soil and water because the horizontal standards on the relevant measurements are not available. Read more in EN15804+A1 chapter 7.4.2.*
